

django

Database-driven journalism

Lawrence Journal-
World
Lawrence, KS

Oh. The Django guys,
right?

But we do so much
more

Lifecycle of a "data story"

- Reporter gets data
- Parse/normalize data into RDBMS
- Build web interface
- Offer cleaned data for download

Python every step of
the way

Real-life example

Crime reports on local university campus

Reporter got the data

- Three years of reports
- Organized by residence hall
- Tables embedded in Microsoft Word :(

Google to the rescue!

Google™
Docs BETA

Step 1

- Upload MS Word to Google Docs
- Export as HTML

Step 2

- Google Docs produces almost-valid HTML
- BeautifulSoup gets us the rest of the way
- End result: a nicely-formatted CSV file

Data modelling

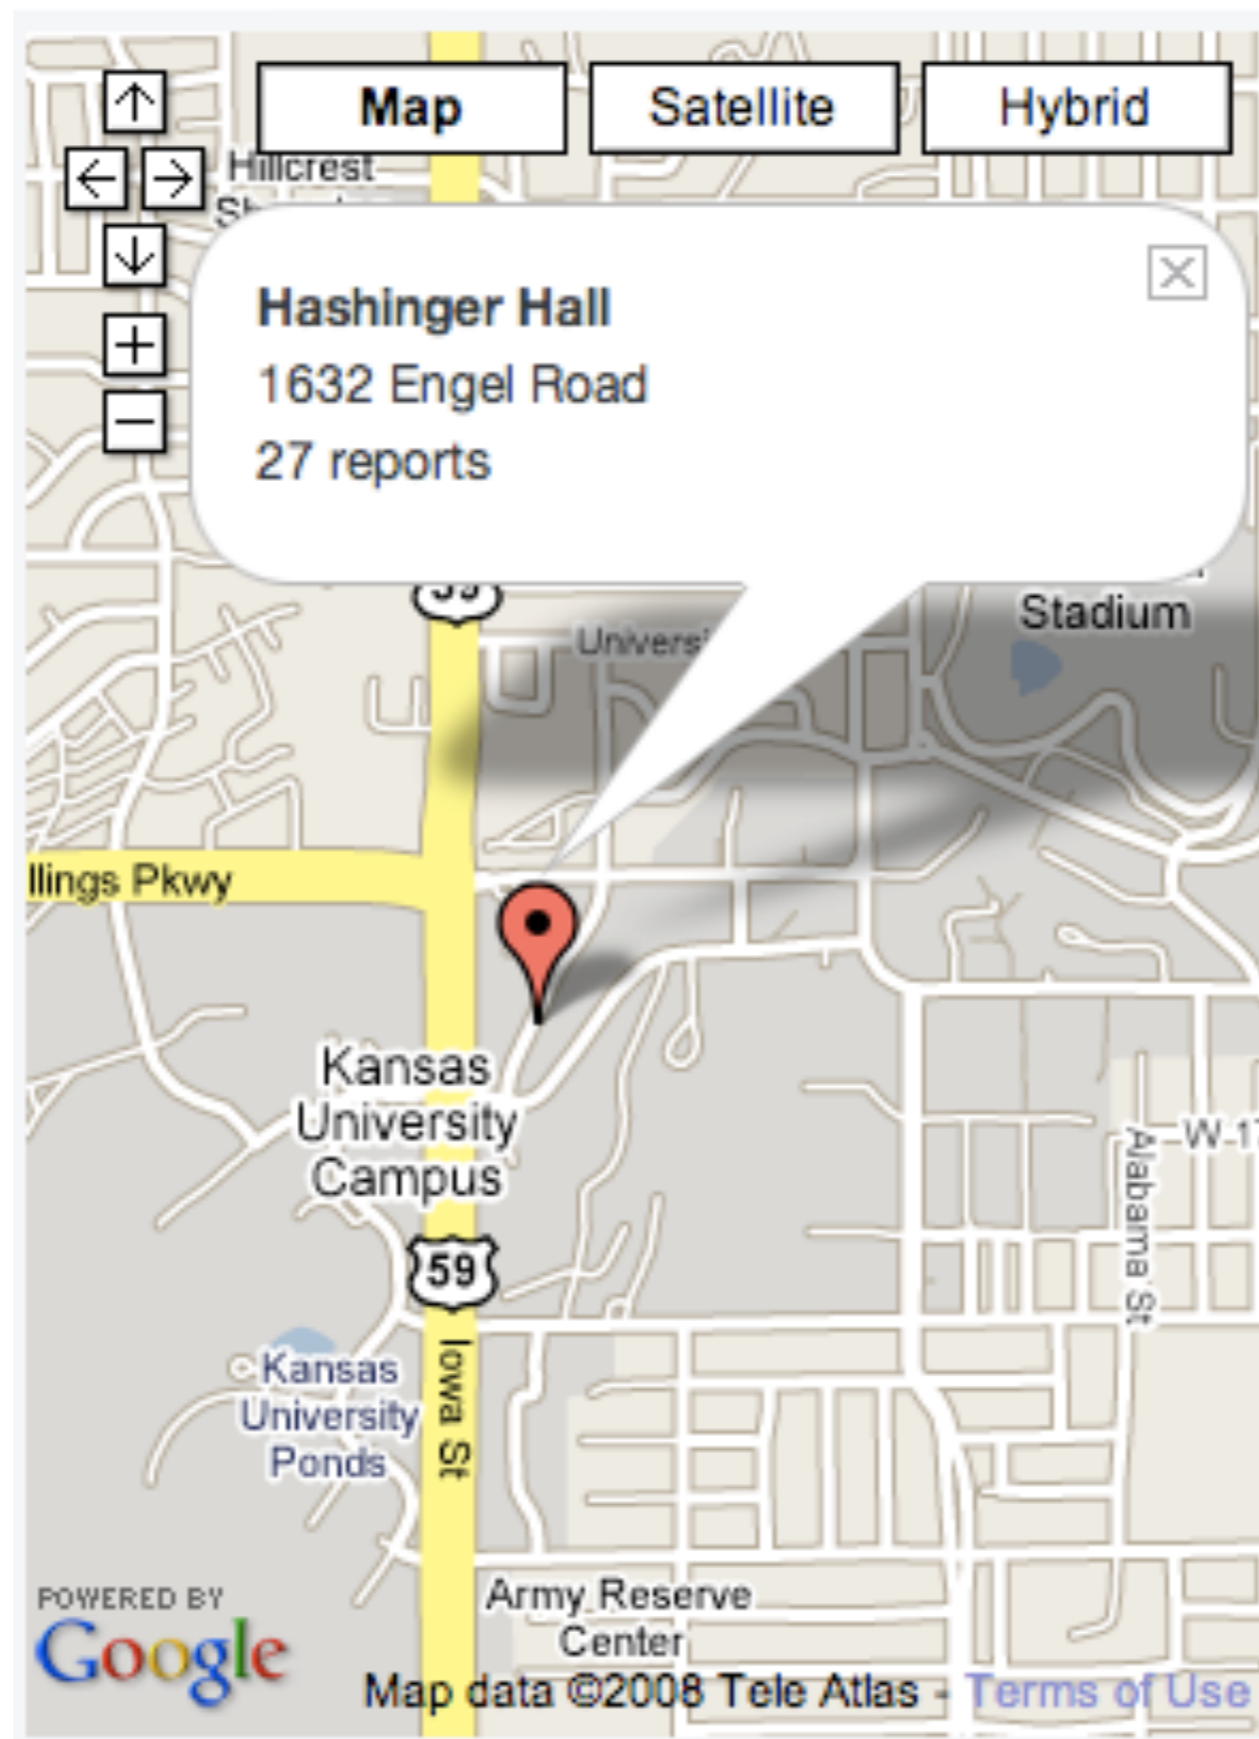

- Build a few classes: residence hall, crime, statute, etc.
- Import from the CSV files
- Used Django for this, but don't have to; any ORM is good, or just DB-API

Web-based views

- Pick your favorite web framework/toolkit
- We use Django
- Mostly you're slinging around lists of dictionaries

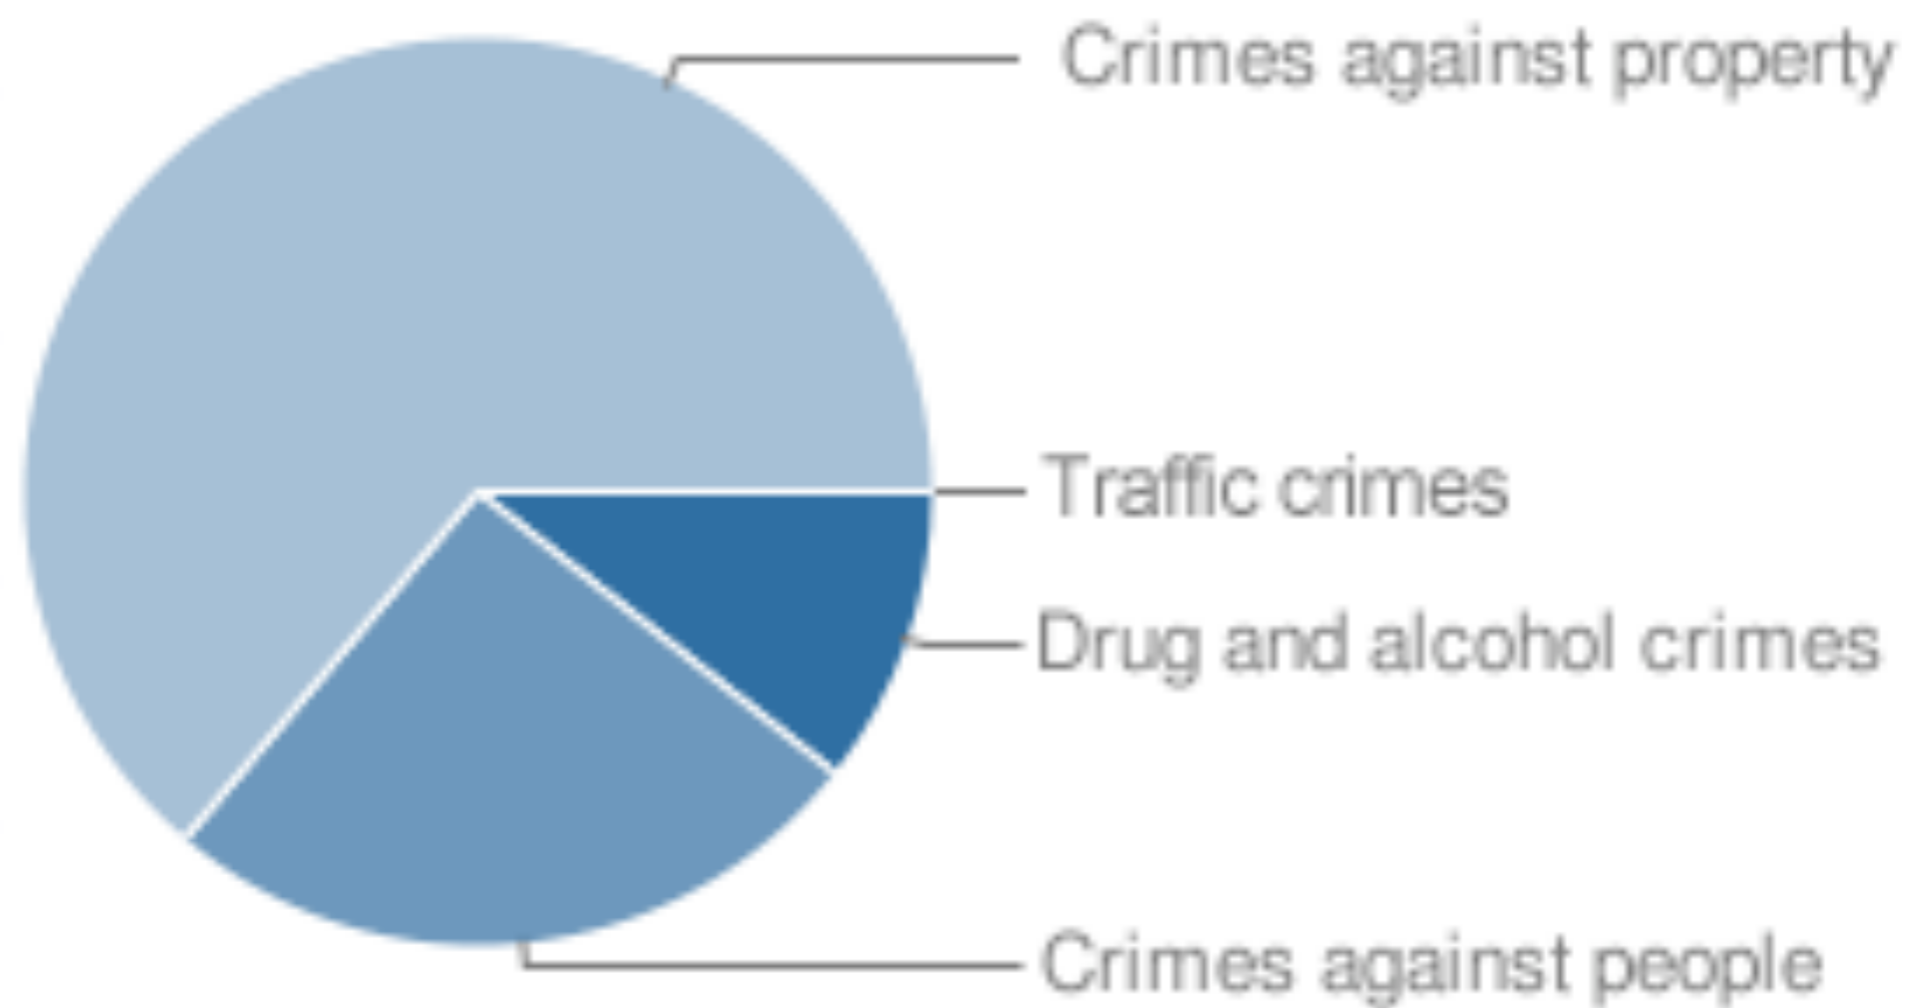

Make it fancy

- geocoding of addresses with geopy
(<http://exogen.case.edu/projects/geopy/>)
- Now we have maps

Make it fancy

- Google Charts API is just HTTP, we can talk to that with Python
- Now we have charts

And put it all together

Crimes reported in KU residences 2005–2007

Between **2005** and **2007**, **552** crimes were reported in KU residences, and a number of other crimes were reported on campus. Below, you can browse through the residence crime reports in a variety of ways: by **year**, by **residence hall**, and by **type of crime**. You can also **download the data** and examine it yourself, and **read the related story**.

Browse reports by year:

2005	198 reports
2006	185 reports
2007	169 reports

Browse reports by type:

Drug and alcohol crimes	60 reports
Crimes against people	142 reports
Crimes against property	345 reports
Traffic crimes	5 reports

Browse reports by residence:

Battenfeld Scholarship Hall	3 reports
Corbin Hall	21 reports
Dennis E. Rieger Scholarship Hall	2 reports
Douthart Scholarship Hall	0 reports
Ellsworth Hall	45 reports
Gertrude Sellards Pearson Hall	17 reports
Grace Pearson Scholarship Hall	1 report

http://
www2.ljworld.com/
data/crime/ku/

This took two days

- Got the data on Wednesday, showed off the interface on Friday
- Took less time to prepare this interface than to write the story for the newspaper
- Hooray Python!

We do this all the time

- Home foreclosures: http://www2.ljworld.com/foreclosures/sheriffs_sale/
- Use of university planes: <http://www2.ljworld.com/transportation/air/>
- Alcohol violations: http://www2.ljworld.com/data/alcohol_violations/mip/
- And more: http://www2.ljworld.com/special_coverage/

Python all the way
